PROFESSIONAL SUMMARY

Full stack web developer with knowledge in several front-end and back-end languages, responsive frameworks, databases and best code practices. Currently transitioning into a programming career with extensive experience in business management, direct sales and customer service. Self motivated, fluent in Spanish, and adept at working with diverse teams to implement projects and passionate about software architecture and cloud computing.

TECHNICAL SKILLS

Front-End: React, HTML, JavaScript, jQuery, React, CSS, Bootstrap, Materialize, API, AJAX
Back-End: Mongoose, Sequelize, Node.js, Express.js, Axios
Databases: MySQL, MongoDB, Firebase
Tools: Visual Studio Code, MySQL Workbench, Robo3T
Task & Project Management: Git, Git Bash
Platforms: GitHub, Heroku, Eloqua
Microsoft Office: Excel, Word, PowerPoint

PROJECTS

The Friendship Cure
Github: https://github.com/jybragg/The-Friendship-Cure
Deployed version: https://friendship-cure.herokuapp.com/
Team Facilitator:
This app is a space for people to connect. By allowing the user to filter possible friendship connections, they are able to find friends in their area who share similar interests. The app's friend requesting, messaging and chatting features will increase the likelihood for newly-found friends to meet and connect.
● **Front-End**: React, JavaScript, CSS and Materialize   ● **Databases:** Firebase
● **Back End:** Node.js, Express.js   ● **Project Management:** Git, Git Bash   ● **Deployment:** Heroku

Amman Imman Field App
Github:https://github.com/jybragg/field-app
Deployed version: https://immanfieldapp.herokuapp.com/
Team Facilitator:
Amman Imman is a non-profit NGO that works in the Azawak region of Africa, in between Niger and Mali. This was a collaborative project that allows local field nurses and team members to train individuals on multiple health and sanitation practices that otherwise would not have been available to them. We used visual representations as a universal communicator.
● **Front-End**: React, JavaScript, CSS and Bootstrap   ● **Databases:** MongoDB, Mongoose
● **Back End:** Node.js, Express.js   ● **Project Management:** Git, Git Bash   ● **Deployment:** Heroku

PROFESSIONAL EXPERIENCE
